DETAILED ACTION

Allowable Subject Matter

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance:
 - Mizuno (6,073,689) discloses an actuator that is moved by a stepper motor.
 - Watson (6,414,455) discloses a drive system for a supplying the control unit with torque requirements, reducing the drive frequency when more torque is needed and increasing the drive frequency when less torque is needed, the frequency changes in a near continuous way, the torque requirements are based on instantaneous torque, and reducing the drive frequency when the torque requirement exceeds a first threshold and increasing the drive frequency if the torque requirement becomes lower than a second threshold.
 - Uchinami (JP 08051795) discloses a drive frequency upper limit that is based on output torque.
 - With respect to claims 1 and 7, the primary reason for allowance is because the Prior Art does not disclose or suggest modifying the device of Mizuno, Watson, and Uchinami so the drive frequency is varied in steps based on a torque threshold.
3. Therefore, based on the amendments presented by the Applicant, the Examiner acknowledges the Prior Art make obvious the Applicant's claimed invention.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
